Participant Reactions

Dear Bart & Michael

We wanted to send you a little follow-up note after participating at your seminar and workshops in Virginia and Pennsylvania.

First, your selection of these two venues as hosts of your seminars deserves to be recognized for their facilities, hospitality and great food. Both venues were an excellent choice. Before the seminar even commenced, the care you devoted to the participants through email and phone regarding any and all details of the event shows professionalism, which in return created trust and anticipation for the participant. Upon arrival, you're greeting and concern for any needs we might have did not go unnoticed and helped set the stage.

The seminar structure, content and deliverance were well executed. Bart's presentation could not have been more evident. It is not often, if at all, so much material is offered to you for digestion at one sitting. Bart's wisdom of the content clearly showed itself.

There are many systems out there that top trainers can work within and use; however there are very few

that are able to relay their system for one to follow. Bart has taken his experience and knowledge and has created a system in which he trains by, but is also able to forward this system to you with clarity. If one opens his\her mind to receive it and truly understand it, it is a system which you can use diversely in the training for any dog. A person that has this ability is known as a teacher. This attribute is a gift and one that makes you stand out among the best.

We hope to see you both soon and look forward to more Bamboo, Bears and Bart.....

Bart- Hold onto your passion, it's contagious and genuine. Training for us and our dogs has been a ton of fun since we came out. Thanks so much!!

Renee Lacescu & Craig Wandtke

He [Bart] is a man with a true passion to learn and teach.

Hillel Schwartzman

For me, training with Bart is demoralizing and motivating. He passively shows you how much more training you

need. He shows you how much more your training program can develop on your own. He shows you your current strengths inside of your own program. And that not only give's everyone hope and motivation to do more and to do better but that to me is the exciting part!

Moe Lindesey

Miscellaneous Remarks

After one last seminar in Tulsa, OK, it is time for Bart to leave the United States. It has been a whirlwind tour as we have traveled from Washington, D.C. to California and seen and met many nice people and good dog trainers and enthusiasts.

We will stay in touch from Europe and hope to be back in the United States in 2014. Hopefully, big news there! Stay tuned!

Here is a small clip from the workshop where Bart shows how to use a bamboo as a boundary for a dog. This was in the seminar dubbed: Touching Leads to Kissing, and Kissing Leads to.... Many times a small thing gets quickly out of control!
